

Revolutionary in-line twisting system

- **In-line production:** TWISTUP combines two production processes in a single pass, saving the time and money involved in moving all the bobbins from one machine to the next.
- **Fully compatible with your current machinery.** No need for pre-installation. Automatic synchronisation to the speed of the next process.
- **Modular machine:** The 3-spindle modules adapt to any type of process and offer maximum flexibility.
- **Double twist unit, maximum flyer speed:** 3,500 rpm mechanics (equivalent to 7,000 rpm in simple twisting).
- **All changes made directly on screen.**
- **Automatic synchronisation:** TWISTUP detects the yarn speed in the following process and adapts automatically.
- **Length counter-warning light:** the light comes on before the bobbin is finished to minimise stop times.
- **Twisting ranges available:** 0-999 twist/metre, S or Z.
- **All doors and safety devices compliant with EC standards.**
- **Feed bobbins of up to 300 mm height and 300 mm diameter.**
- **Twist quality:** automatic self-control and adjustment system to ensure perfect twisting

Technical Features

TECHNICAL FEATURES	units	TUP-2x1
Number of spindles per module	---	3
Max. Number of spindles	---	Unlimited
Feed Speed	m/min	Automatic synchronisation to the speed of the next process
Max. Mechanical spindle speed	rpm	3.500 rpm flyer speed, (equivalent to 7.000 rpm in simple twisting)
Power supply	---	400V III-N, 50/60 Hz.
Weight	Kg	525
Machine Dimensions	mm	Long: 1300mm; Large: 1250mm; Height: 1350mm
YARN		
Feeding bobbin shape	---	Any kind of shape package
Feeding bobbin dimensions	mm	Max height: 300mm tub (295mm yarn); Max. diameter.: 300mm
Twist range	twists/ metre	Any twist between 0-999
FINAL BOBBIN		
Bobbin shape	---	Bobbin of next process.

The technology used in this product is protected by appropriate international patents.
